Executive Summary

PreOne Business Rules Catalog (BRC) v1.0 हा PreOne Enterprise Build Roadmap चा तिसरा foundational document आहे — Vision Document आणि Business Process Model (BPM) नंतर. BRC चा primary purpose म्हणजे प्रत्येक business decision ला govern करणारे rules एका centralized, machine-readable, AI-friendly format मध्ये capture करणे, ज्यामुळे Master PRD, DDD models, ERD, API contracts आणि final code सर्व एकाच rule source वर depend करतील.

ह्या document मध्ये 176 rules 12 categories मध्ये विभागल्या आहेत: Eligibility, Financial, Operational, Academic, HR, Inventory, Communication, Compliance, Approval Matrix, Notification, Data Governance, आणि Platform/Multi-tenant. प्रत्येक rule ला unique Rule ID (e.g., R-ADM-007) आहे जो PRD acceptance criteria, ADR references, आणि unit tests मध्ये cross-reference केला जाईल. ह्या ID convention मुळे AI assistants ला business context precise मिळतो आणि development team ला ambiguity न पडता rule locate करता येते.

BRC हा BPM आणि PRD मधील missing link आहे. BPM फक्त "what happens" define करतो (process flow), पण "why a decision is taken this way" define करत नाही. PRD मध्ये rules feature-by-feature scatter होतात — acceptance criteria मध्ये, edge cases मध्ये, error messages मध्ये. BRC त्या सर्व rules एका जागी consolidate करतो आणि तिथून PRD/DDD/code सर्वत्र reference करतो. ह्यामुळे rule change करायचा असेल तर एका जागी change करावा लागतो — नव्हे ठिकाणी trace करावे लागत नाही.

Document ची status आता Draft (Business Review) आहे. प्रत्येक rule ची review business stakeholders (Principal, Owner, Counsellor, Teacher, Accounts, HR) सोबत होईल. Review पूर्ण झाल्यावर status Business Freeze करता येईल आणि नंतर Master PRD Phase सुरू होईल. BRC वर कोणताही change करण्यासाठी formal Change Request (CR) process follow करावा लागेल — version increment, impact analysis, आणि sign-off mandatory.

How to Use This Document

Rule ID Convention

प्रत्येक rule ची ID format R-DOM-NNN आहे, जिथे DOM हा 3-letter domain code आहे आणि NNN हा sequential number आहे. उदा.: R-ADM-007 = Admission domain ची 7वी rule. ही convention stable आहे — एकदा ID assign झाली की ती change होणार नाही, जर rule delete झाली तरी ID retire केली जाते पण reuse होत नाही.

Schema Fields

प्रत्येक rule 14 fields मध्ये structured आहे. हे fields AI LLM context feeding, unit test generation, आणि developer onboarding साठी design केले आहेत:

- Trigger — कोणत्या event नंतर rule evaluate होते (e.g., application form submission).
- Condition — IF/THEN logic ज्यानुसार decision होते.
- Action — rule pass झाल्यावर काय होते (allow, block, escalate, notify).
- Exception — कोणत्या परिस्थितीत rule override होऊ शकते आणि कोण.
- Owner Role — कोणत्या role च्या owner ला rule enforce करण्याची primary responsibility.
- Source — rule कुठून आली (school policy, government regulation, industry best practice).
- Compliance — कोणत्या compliance framework शी link आहे (DPDP, POSH, Fire Safety).
- Related ADR — कोणत्या Architecture Decision Record शी technical link आहे.

Cross-References

BRC हा standalone document नाही — तो Vision, BPM, ADR, आणि PRD सोबत deeply linked आहे. Cross-Reference Matrix (Appendix A) मध्ये प्रत्येक rule ची ADR mapping दिली आहे. PRD phase मध्ये प्रत्येक feature च्या acceptance criteria मध्ये relevant Rule IDs cite केले जातील — उदा.: "Acceptance: R-ADM-007 satisfied".

Version Control

BRC चे versioning semantic versioning follow करते — MAJOR.MINOR.PATCH. MAJOR version business freeze नंतरच change होतो (breaking rule changes). MINOR version नवीन rules add केल्यावर increment होतो. PATCH version rule clarification, typo fixes साठी. Current version 1.0 — pre-freeze draft.

Change Request Process

एकदा BRC Business Freeze झाल्यावर कोणतीही rule change साठी formal CR process mandatory आहे: (1) CR form मध्ये rule ID, current behavior, proposed change, business justification भरावे लागेल; (2) Impact analysis — कोणते PRD sections, ADRs, code modules affected होतील; (3) Product Lead + Eng Lead joint sign-off; (4) Version increment + changelog update; (5) Stakeholder communication.

Rule Schema Definition

प्रत्येक rule 14 fields मध्ये structured आहे. खालील table प्रत्येक field ची purpose आणि example दर्शवतो:

Field	Purpose	Example
Rule ID	Unique identifier (R-DOM-NNN format). Stable, never reused.	R-ADM-007

Field	Purpose	Example
Domain	Business domain the rule belongs to (from BPM).	Admission
Sub-Process	Specific sub-process within the domain.	Document Verification
Title	Short human-readable rule name.	Mandatory Document Check
Trigger	Event that causes rule evaluation.	Application form submission

Action	What happens when rule fires.	Block + show missing docs list
Exception	Conditions under which rule can be overridden.	Branch Head discretionary approval
Owner Role	Role accountable for enforcing rule.	Admission Counsellor
Source	Where rule originated (policy/regulation).	School Policy 2024 §3.2
Compliance	External compliance framework link.	DPDP Act §4
Status	Draft / Reviewed / Approved / Frozen.	Approved
Version	Rule version (independent of doc version).	1.0
Related ADR	Architecture Decision Record references.	ADR-012, ADR-019

2. Eligibility Rules

Eligibility rules define कोणत्या conditions मध्ये एक candidate admission साठी eligible आहे. ह्या rules चा primary goal म्हणजे age-appropriate placement, mandatory documentation completeness, आणि medical fitness ensure करणे. NEP 2020 Early Childhood Care and Education (ECCE) norms आणि school-specific policies यांच्या आधारे सर्व rules draft केल्या आहेत. Each rule ची compliance DPDP Act (child data consent) आणि Right to Education (RTE) Section 12 (25% reservation compliance) शी mapping केली आहे.

ह्या category मध्ये 15 rules आहेत. प्रत्येक rule खालीलप्रमाणे detailed केली आहे — summary table सर्व rules चा quick overview देते, त्यानंतर प्रत्येक rule चा full schema card दिला आहे.

11. Notification Rules

Notification rules govern कोणत्या event साठी कोणता notification channel (SMS/Email/Push/WhatsApp), कोणत्या timing मध्ये, आणि कोणत्या priority ने trigger होईल. ह्या rules चा primary goal म्हणजे right message + right channel + right time — without spamming parents. Absence alerts सर्वात high priority (child safety concern), birthday greetings सर्वात low priority.

ह्या category मध्ये 12 rules आहेत. प्रत्येक rule खालीलप्रमाणे detailed केली आहे — summary table सर्व rules चा quick overview देते, त्यानंतर प्रत्येक rule चा full schema card दिला आहे.

11.1 Summary Table — Notification Rules

Rule ID	Title	Trigger	Action	Owner
R-NOT-001	Fee Due Reminder Cadence	Invoice due date approaching / overdue	Multi-channel cascade; parent app + SMS + email + WhatsApp; auto- stop after parent acknowledges	System (Automated) + Accounts Team
R-NOT-002	Child Absence Alert	Child marked absent in attendance	Push + SMS to primary parent; if no ack within 30 min, call primary parent; if unreachable, secondary contact	System (Automated) + Teacher

Rule ID	Title	Trigger	Action	Owner
R-NOT-003	Daily Report Push Time	Daily school end (pickup)	Auto-compile daily sheet (activities, meals, nap, observations, photos); push to parent app + email	System (Automated)
R-NOT-004	Birthday Greeting	Child birthday	Customizable template; school logo; photo if consented; small in-app celebration	System (Automated)
R-NOT-005	Festival Greeting	Public festival day	Multi-language greeting; cultural context; school closure reminder if applicable	System (Automated) + Branch Admin
R-NOT-006	Incident Notification	Incident reported (R-OPS-015)	Auto-notify based on severity; Branch Head involvement for HIGH; documentation shared via app	Teacher + Branch Head
R-NOT-007	Photo Share Alert	Teacher shares photo with parent	Push with thumbnail; parent taps to view full; like/comment options; teacher notified of parent engagement	System (Automated)

13. Platform & Multi-tenant Rules

Platform & Multi-tenant rules govern SaaS layer — tenant isolation, subscription lifecycle, feature flags per tier, license seat allocation, आणि platform admin actions. ह्या rules चा primary goal म्हणजे tenant data security + revenue protection (subscription enforcement) + fair resource allocation.

ह्या category मध्ये 10 rules आहेत. प्रत्येक rule खालीलप्रमाणे detailed केली आहे — summary table सर्व rules चा quick overview देते, त्यानंतर प्रत्येक rule चा full schema card दिला आहे.

13.1 Summary Table — Platform & Multi-tenant Rules

Rule ID	Title	Trigger	Action	Owner
R-PLT-001	Tenant Data Isolation	Every data access query	Enforce at ORM layer (Prisma row-level security); audit log all cross-tenant denial attempts	IT + Platform Admin
R-PLT-002	Subscription Grace Period	Subscription renewal overdue	Notify Director + Branch Head + Accounts; restrict features progressively; data archived (read-only) for 90 days post-suspension	Platform Admin + Accounts
R-PLT-003	Tenant Suspension Process	Subscription breach / compliance violation / abuse	Notify tenant admin; provide export link; remediation plan; reactivation process documented	Platform Admin + Director + Legal
R-PLT-004	Feature Flag per Tier	Tenant onboarding / plan upgrade	Auto-enable features per tier; hide restricted features in UI; upgrade triggers feature unlock	Platform Admin + Product

Rule ID	Title	Trigger	Action	Owner
R-PLT-005	License Seat Allocation	User added to tenant	Notify tenant admin; offer seat upgrade; pending user request queued	Platform Admin + System (Automated)
R-PLT-006	Branch-Level Data Partition	Multi-branch tenant data access	Enforce branch_id in queries; cross-branch data only for Director role; audit logged	IT + Compliance
R-PLT-007	Platform Admin Role Restrictions	Platform admin action	Approval workflow; access request with justification; auto-expire; quarterly compliance review of all admin accesses	Platform Admin + Director + Compliance
R-PLT-008	Cross-Tenant Data Block	Any cross-tenant data reference in code	Code-level enforcement (Prisma middleware); deny by default; explicit allowlist for legitimate cross-tenant operations (platform-wide analytics with anonymization)	IT + Platform Admin
R-PLT-009	Tenant Onboarding Validation	New tenant registration	KYC verification; GSTIN validation; authorized signatory OTP; initial subscription payment	Platform Admin + Sales

Rule ID	Title	Trigger	Action	Owner
R-PLT-010	Tenant Offboarding Process	Tenant cancellation request	Final invoice settlement; data export link (30-day validity); tenant deactivation; data archived 90 days; permanent deletion after	Platform Admin + Accounts + Compliance

13.2 Detailed Rule Cards — Platform & Multi-tenant Rules

R-PLT-001 — Tenant Data Isolation

Rule ID	R-PLT-001
Domain	Platform
Sub-Process	Tenant Isolation
Title	Tenant Data Isolation
Trigger	Every data access query
Condition	IF user.tenant_id != data.tenant_id THEN deny access (HTTP 403)
Action	Enforce at ORM layer (Prisma row-level security); audit log all cross-tenant denial attempts
